

User MANUAL

Drone Flight Checklist (Website)

Developed by BINUS University

Introduction

What is Drone Flight Checklist Website?

Drone Flight Checklist web application is a system designed to simplify the process of creating and completing pre-flight, post-flight and assignment checklists on a drone.

Through this platform, users can dynamically create customized checklist forms based on their needs, such as checking battery condition, propellers, GPS signal, and weather conditions, without relying on manual paper forms. Additionally, users can fill out these forms online, allowing the data to be automatically stored and easily accessed for monitoring and evaluation purposes.

How It Works?

Drone Flight Checklist web application allows you to:

- Create a new form
- Edit and Adding new questions
- Public a form to be visible by other users
- Create a template for different types of forms
- Able to fill out forms in a template manually
- Submit the filled forms
- And see the recently created or submitted

How To Access The Website?

You can access the website by entering this link:

<http://csresearch.my.id/webdrone/>

How To Download Mobile Application?

You can download the mobile application using the tutorial in this User Manual on Page 12.

Register

01 Enter the email will be used for the account.

02 Enter the username for the account.

03 Enter a strong password and confirm the second time to make sure it's correct.

04 Click the button once finish.

05 Click the "Login here" to go back if already have an account. For website user manual click "User Manual".
